SUMMARY

Informatics Engineering graduate with internship experience in backend and web application development. Experienced in building and maintaining web applications and RESTful APIs using Laravel, Node.js, Next.js, and Supabase, with hands-on experience in MySQL, PostgreSQL, and MongoDB. Familiar with frontend development using React, Next.js, Tailwind CSS, and Bootstrap, as well as Git-based version control and collaborative development workflows using GitHub and GitLab. Interested in backend, frontend, and full-stack software development, with additional experience in machine learning.

EDUCATION

UNIVERSITAS TRUNODJOYO MADURA

Bangkalan, Indonesia

Bachelor of Informatics Engineering | GPA 3.85/4.00

2022 - 2026

Thesis: Rice Variety Classification Using MobileNetV3 with Efficient Channel Attention

WORK EXPERIENCE

MINILEMON TECHNOLOGY

Surabaya, Indonesia

Backend Developer Intern

October 2025 – December 2025

- Developed backend functionality for 5 core features of a Period Tracker application using Next.js and Supabase, covering authentication, dashboard, cycle tracking, and period prediction.
- Configured 2 Supabase tables for user and cycle data, including authentication and Row Level Security (RLS) policies.
- Developed and integrated Server Actions for authentication, dashboard data, cycle creation/editing, and period prediction.
- Developed a period prediction feature based on historical cycle data, including previous menstruation dates, cycle duration, and intervals between cycles.

INAGATA TECHNOSMITH

Malang, Indonesia

Backend Developer Intern (MBKM Mandiri)

February 2025 – June 2025

- Contributed to the development and maintenance of Laravel backend services for the SIAKAD Ma'had Aly Sa'idusshiddiqiyah Jakarta across multiple academic and student administration modules.
- Developed and integrated RESTful APIs supporting 3 Kepesantrenan features: permissions, violations, and night-class attendance.
- Implemented Excel import/export functionality for 4 data categories: students, lecturers, grades, and attendance, including fixes for column-mapping issues that previously prevented correct data processing.
- Developed and adjusted final-project management features covering 3 stages: proposal seminar, thesis defense, and comprehensive examination, with sequential stage requirements.
- Optimized the dashboard by consolidating data retrieval into 1 dedicated endpoint, replacing multiple endpoint calls previously used to populate dashboard content.

PT SABA INDOMEDIKA

Surabaya, Indonesia

IT Support Intern

January 2025 – February 2025

- Developed a web-based laboratory reagent inventory application using Laravel, Bootstrap, jQuery, and MySQL, covering dashboard, master data, transactions, reporting, user management, and access control.
- Implemented inventory workflows for reagent master data, incoming and outgoing items, stock forecasting, and reporting, along with Excel import/export functionality.
- Implemented automated barcode generation for imported reagent data, successfully processing approximately 100 reagent records during testing.
- Developed role-based access features supporting 3 user roles: Super Admin, Head of Warehouse, and Warehouse Admin.

- Guided 80 students across 2 classes, with 40 students in each class, during Web Application Development (PAW) laboratory sessions.
- Prepared 8 practical modules and provided technical guidance throughout the laboratory sessions.
- Conducted practical assistance and evaluated assignments for 20 students, with 10 students assigned from each class, across 8 practical sessions.

PROJECTS

- **Period Tracker App** – A period tracking application with 5 core features covering authentication, dashboard, cycle tracking, and period prediction. The application stores user and cycle data and provides period predictions based on historical cycle information. Built with Next.js and Supabase.
- **Backend SIAKAD Ma'had Aly Sa'iidusshiddiqiyah Jakarta** – Backend system for an Academic Information System (SIAKAD) supporting student data, grades, schedules, attendance, and academic administration across multiple modules. The system includes Kepesantrenan features, Excel-based data management, dashboard services, and final-project administration. Built with Laravel and MySQL.
- **Laboratory Reagent Inventory Management System** – A web-based application for managing laboratory reagent inventory, covering master data, transactions, reporting, user management, access control, and barcode generation. Built with Laravel, Bootstrap, jQuery, and MySQL.

TECHNICAL SKILLS

Languages: JavaScript, TypeScript, PHP, Python

Frontend: HTML, CSS, React, Next.js, Tailwind CSS, Bootstrap, jQuery

Backend: Laravel, Node.js, Express.js, RESTful APIs

Database & BaaS: MySQL, PostgreSQL, MongoDB, Supabase

Tools: Git, GitHub, GitLab, Postman, Figma

ML: TensorFlow, PyTorch

TRAINING

- **Dicoding Academy** – *Web Programming Basics*
- **Dicoding Academy** – *JavaScript Programming Fundamentals*
- **Dicoding Academy** – *Creating a Web Front-End for Beginners*
- **Dicoding Academy** – *Beginner Back-End Development with Javascript*
- **Dicoding Academy** – *Prompt Engineering for Software Developers*
