SUMMARY

Bachelor's degree graduate in Informatics Engineering with experience as a Backend Developer and IT Support. Skilled in web application development using Laravel, Node.js (Express), React, and Next.js, with hands-on experience in MySQL and MongoDB database management. Proficient in designing and developing RESTful APIs and familiar with machine learning frameworks such as TensorFlow and PyTorch. Experienced in using Git, GitLab, ClickUp, Postman, and Figma throughout the software development lifecycle. A fast learner with strong problem-solving skills, capable of working effectively both independently and collaboratively in team environments.

EDUCATION

UNIVERSITAS TRUNODJOYO MADURA <i>Bachelor of Informatics Engineering, GPA 3.85/4.00</i>	Bangkalan, Indonesia 2022 - 2026
---	---

WORK EXPERIENCE

MINILEMON TECHNOLOGY <i>Backend Developer Intern</i>	Surabaya, Indonesia October 2025 – December 2025
- Contributed to the development of the Period Tracker App at Minilemon Technology as a backend using Next.js and Supabase. - Configured Supabase by creating tables, setting up authentication, and implementing RLS policies. - Integrated Supabase with the Next.js frontend using Server Actions. - Developed a feature to predict menstrual cycles based on stored user data.	

PT INA GATA PERSADA <i>Backend Developer Intern</i>	Malang, Indonesia February 2025 – June 2025
- Contributed to the development and maintenance of backend services using the Laravel framework for the SIAKAD Ma'had Aly Sa'iidusshiddiqiyah Jakarta project. - Built RESTful APIs and integrated them with the frontend to support smooth application data flow. - Worked on the Kepesantrenan features, including permissions, violations, and night class attendance. - Developed Excel export and import features for student data, lecturer data, student attendance, lecturer attendance, and grades. - Assisted in the final project module by fixing bugs, improving performance, and adjusting features related to registration and thesis stages. - Optimized and adjusted APIs used in the dashboard to improve overall system performance.	

PT SABA INDOMEDIKA <i>IT Support Intern</i>	Surabaya, Indonesia January 2025 – February 2025
- Developed a laboratory reagent inventory application using Laravel, Bootstrap, jQuery, and MySQL. - Implemented operational support features, including barcode printing and inventory data management. - Conducted testing, bug fixes, and interface optimization to make it more responsive and user-friendly. - Collaborated with internal teams to ensure the application ran according to laboratory operational needs.	

WARGALAB JURUSAN TEKNIK INFORMATIKA <i>Teaching Assistant</i>	Bangkalan, Indonesia July 2024 – December 2024
- Guiding students in practicum sessions at the Informatics Laboratory, particularly in the Pengembangan Aplikasi Web (PAW) course, to improve their understanding and technical skills in web development. - Preparing practicum materials based on existing modules and providing direct instruction to students during activities.	

- Playing an active role in supporting the smooth running of practicum activities, including assisting in the evaluation and assessment of student work.

CERTIFICATION

- **Dicoding Academy** – *Web Programming Basics*
- **Dicoding Academy** – *JavaScript Programming Fundamentals*
- **Dicoding Academy** – *Creating a Web Front-End for Beginners*
- **Dicoding Academy** – *Beginner Back-End Development with javascript*
- **Dicoding Academy** – *Cloud and Generative AI Fundamentals on AWS*
- **Dicoding Academy** – *Getting Started with Python*
- **Dicoding Academy** – *Artificial Intelligence Fundamentals*
- **Dicoding Academy** – *Machine Learning for Beginners*
- **Dicoding Academy** – *Data Visualization Fundamentals*
- **Dicoding Academy** – *Deep Learning Fundamentals*
- **Dicoding Academy** – *Prompt Engineering for Software Developers*

SKILLS

- **Frontend:** HTML, CSS, JavaScript, Bootstrap, Tailwind, jQuery, React, Next.js
- **Backend:** Laravel, Node.js (Express), Flask, RESTful
- **Databases:** MySQL, MongoDB
- **ML:** Python, Tensorflow, Pytorch
- **Tools:** Git, Github, GitLab, ClickUp, Postman, Figma
- **Others:** Web Scraping, Godot Game Engine

PROJECT

- **Period Tracker App** – A period tracking application developed during an internship at Minilemon Technology. The app helps users log menstrual symptoms, blood flow, mood, and other related notes, while also predicting the next menstrual period based on stored data. Built with Next.js and Supabase.
- **Backend SIAKAD Ma’had Aly Sa’iidusshiddiqiyah Jakarta** – Developed the backend for the Academic Information System (SIAKAD) of Ma'had Aly Sa'iidusshiddiqiyah Jakarta during an internship at PT. Ina Gata Persada. The system manages student data, grades, schedules, and academic administration. Built with Laravel and MySQL, with a focus on data management, module integration, and backend performance optimization.
- **Laboratory Reagent Inventory Management System** – A web-based application developed during an internship at PT. Saba Indomedika to manage laboratory reagent inventory. The system includes stock tracking, item management, usage monitoring, and barcode printing for efficient identification. Built with Laravel, Bootstrap, jQuery, and MySQL.
